GREEN POLICY

The Fur-Bearers believes in protecting fur-bearing animals in the wild and confinement. In an effort to help achieve this goal, and to be consistent in our ethical values, we will act in a responsible manner in all the ways in which we operate.

We will:

- Be fur-free. All staff and volunteers are not permitted to wear real or fake fur (as it promotes the 'look' of fur).
- Assess our activities annually to identify areas where we can minimize negative impacts to people, the environment and all animals.
- Minimize waste through recycling, and careful and efficient use of all materials and energy.
- Purchase only recycled, FSC certified office paper and paper for our literature/handouts and newsletters.
- Host only vegan events and fundraisers. All food and products at all Fur-Bearer's events and fundraisers will be vegan (contain no animal products, no-animal testing).
- Publicize our environmental and cruelty-free position.
- Train employees and volunteers in good environmental and cruelty-free practices.
- Aim to include environmental and ethical considerations in investment decisions where appropriate.
- Continually assess our operations to be mindful of our impacts on people, the environment and all animals.
