

Petition to the City of Calgary

We, the undersigned, draw the attention of the City of Calgary to the following:

THAT every year, domestic animals and non-target species are being caught in body-gripping traps (including leg-hold, Conibear and snares);

THAT such traps are inhumane by their very nature and can lead to devastating pain and suffering of animals;

THAT trapping is an unnecessary attempt to control wildlife populations, support an unnecessary and irrelevant industry; and,

THAT better, truly humane alternatives exist to prevent conflict and promote co-existence.

THEREFORE, your petitioners call upon the City of Calgary to:

Introduce policy to ban the use of all body-gripping traps (including leg-hold, Conibear and snare type traps) AND support co-existence strategies that are based on best available scientific practices.
